PROFILE OVERVIEW

Experienced Senior Data Analyst specializing in Power BI, DAX, and SQL-based reporting. Proven success in designing scalable dashboards, resolving complex reporting issues, and driving data-driven improvements across projects and teams.

SKILLS

- **Data Analytics & Visualization:** Power BI (DAX, Power Query, Paginated Reports), SQL Server Management Studio (SSMS), Power Apps, Power Automate, SharePoint, Dataverse
- **Programming Languages:** Python, SQL, Java, JavaScript, HTML, CSS, C
- **Project & Process Management:** Agile methodologies, project scoping, resource planning, QA testing, technical documentation, stakeholder engagement, performance tracking.

WORK EXPERIENCE

Senior Data Analyst | *Ministry of Public and Business Service Delivery and Procurement* Toronto, ON | Jan 2025 – Present

- **Designed and delivered 14+ secure, audit-ready paginated reports** in Power BI Report Builder for use by courts, legal officials, and government stakeholders. Utilized DAX, RDL, Power BI Desktop, and SSMS with semantic models under a controlled data-promotion pipeline.
- **Led comprehensive migration efforts** from legacy SQL-based reporting to a modern BI infrastructure, reverse-engineering complex queries to ensure historical accuracy and compliance with judicial data standards.
- **Executed detailed test plans** replicating business and legal workflows; performed multiple QA cycles, validated edge cases, and managed UAT sessions to align outputs with end-user and compliance requirements.
- **Facilitated cross-functional stakeholder engagement**, conducting requirement-gathering sessions, feedback reviews, and defect triages to deliver analytics solutions that supported evidence-based decision-making.
- **Directed daily Agile stand-ups and configuration planning meetings**, ensuring transparency and progress tracking through structured documentation and effective task delegation.
- **Proactively managed high-visibility workloads**, re-prioritizing resources and mentoring peers to uphold accuracy, compliance, and timely delivery of critical court reporting solutions.
- **Streamlined governance and release documentation**, improving transparency, reducing rework, and reinforcing adherence to the organization's semantic model approval protocols.

Data Analyst - Program Assistant | *York University* Toronto, ON | Mar 2024 – Jun 2024

- Designed and implemented 5 advanced **Power BI** dashboards, enhancing feedback analysis efficiency by 40%, tracking student employment trends over 5 years to highlight a 700% program growth, and boosting job posting visibility by 25%.
- Conducted **Microsoft Forms** to collect detailed insights on student and employer satisfaction, utilizing **Microsoft Excel Power Query** for data transformation and **DAX** for sophisticated data modeling and analysis.
- Created and maintained **SharePoint sites** and lists as data sources for Power BI dashboards, enabling nightly refresh and automation to ensure up-to-date and accurate reporting.

Data Analyst Intern | *TC Energy* Calgary, AB | May 2022 – Apr 2023

- Built 6 **Power BI** dashboards handling over **3M** rows per dataset in collaboration with the Product Delivery team and integrated data from **Amazon Redshift** for enhanced performance.
- Mastered **DAX, SQL, and Power Query** to boost data analysis and visualization efficiency.
- Resolved over 80 IT service requests via **ServiceNow**, improving response times and user satisfaction, with proficiency in QA testing and validation environments.
- Developed Canvas and Model-Driven **Power Apps** for streamlining licensing processes for **Liquid Pipelines** business, improving their efficiency by 40% through **PowerAutomate** workflow solutions.
- Ensured high data security in Power Platform development, aligning with industry compliance standards.
- Integrated multiple data sources, including **Dataverse** and **SharePoint** to deliver enhanced and comprehensive data-driven user experiences.

Cloud Developer Intern | *TC Energy* Calgary, AB | Jan 2022 – May 2022

- Developed applications using **Python**, leveraging **AWS services** including Glue, Amplify, Lambda, CloudWatch, S3, and OpenSearch that saved the business over \$1M.
- Followed **Agile** methodologies and **Azure DevOps** for secure project management and documentation.
- Improved code quality and reduced post-production issues by 20% through **Pytest** framework.

EDUCATION AND CERTIFICATIONS

Honours Bachelor of Science, Computer Science | *York University*

Toronto, ON

Additional Certifications: Microsoft AI Fundamentals, Google Cybersecurity Professional, Microsoft Cybersecurity Analyst Professional, Developing Serverless Solutions on AWS, NoSQL and DBaaS 101, DevOps on AWS, Scrum Master, SAP Professional Fundamentals
